

MISSION

The mission of The Saville Center for Child Advocacy is to facilitate the protection, prevention and healing of victims of child abuse and to promote the health of families in our community.

IMPACT AREAS

- Community Resiliency
- Healthy Community

PURPOSE

The Saville Center addresses child abuse and the gaps that exist within traditional response systems. When agencies work in silos, children may be interviewed multiple times, experience delays in services and lack coordinated support.

SERVICES

The Saville Center for Child Advocacy brings together law enforcement, child protective services, medical professionals and prosecutors in a single, child-focused setting. This coordinated approach reduces trauma, increases efficiency in investigations, and ensures children and families receive timely, comprehensive care aligned with standards set by the National Children's Alliance.

RESULT

A young child walked through the doors of The Saville Center for Child Advocacy after disclosing abuse. The fear was visible. That child wasn't rushed, pressured or forced to speak. They were given control; something that had been taken from them. In a single, child-friendly forensic interview, surrounded by a team working quietly behind the scenes, the child found their voice. Their caregiver shared that having one place to go, one team, one process, one source of truth made an unbearable situation feel just a little less impossible. Because of this coordinated, trauma-informed response, the child only had to tell their story once. Their voice was heard. The case moved forward.
