Stillwater Habitat for Humanity®

MISSION

Stillwater Habitat for Humanity envisions a world where everyone has a decent place to live. Seeking to put God's love into action, Habitat for Humanity brings people together to build homes, communities, and hope.

IMPACT AREAS

- Financial Security
- Community Resiliency

PURPOSE

To address the critical and growing issue of housing insecurity by partnering with families, volunteers, and supporters to build safe, affordable homes and strengthen our community.

SERVICES

Working with qualifying families to construct homes that are sold at no profit with affordable mortgage terms. This model removes barriers to traditional homeownership, allowing families to invest in their future and achieve long-term stability.

RESULT

A young, single mother who spent time in foster care now has a home where she and her child can put down roots and build a life. Being moved repeatedly when she was young created a strong desire to provide stability for her own child. By working with Stillwater Habitat for Humanity and providing sweat equity, she was able to create generational change for her family by buying an affordable home that provides them with greater personal and financial security.
